4. Comments and suggestions for the teaching assistant

- Victor was just excellent, easily the best TA I have had in any class at any university. I learned so much more just because he was the TA and if I have a shot at passing the exam, it will be due to him. He was always competent and willing to engage and explain things (even when questions were admittedly stupid). Delivered a superb session on MCMC methods and provided helpful individual feedback on assignments, which must have been very time-consuming. If he started working as a professor tomorrow, Cemfi would be better for it.
- An amazing TA with a handling of the theoretical and applied contents at the height of the course, which is quite challenging. He always maintained the best disposition to solve doubts during the class and in the consultation hours, with quite clarifying answers. His way of organizing the material and the assistantships were of great help to keep a good follow up of the course.
- Thanks a lot, this course would much more difficult if you don't help us that much!!
- Victor is a very good TA. He devoted a lot of effort into the our TA session and made it very clear.
- Excellent work Victor, keep the Q&A. We can already tell that you will be an excellent professor once you graduate.
- He is a great TA
- Outstanding TA. Highly clear in explanations and attentive to every question!
- Victor is a fantastic TA and very knowledgeable about the topics of the course. He grades very fairly and takes more than enough time to explain the exercises properly in the TA sessions. Keep it up!
- Great TA! He has put a lot of effort in helping us as much as possible.
